

Senior Microsoft Cloud delivery for complex European environments.

Enki Tech helps organizations and delivery partners improve Microsoft 365, Azure, identity, endpoint, collaboration and IT operations environments through senior consulting, operational support and automation.

15+ years

Cloud, workplace and hybrid infrastructure experience

12,000+ users

Windows 365 Cloud PC migration experience

L2/L3

Collaboration operations and escalation ownership

Europe

Bulgaria - Belgium - cross-border B2B delivery

CORE CAPABILITIES

Focused expertise across the Microsoft Cloud lifecycle

● Microsoft 365 & Collaboration

Exchange Online, Teams, SharePoint, OneDrive and hybrid collaboration operations.

● Azure & Hybrid Infrastructure

Azure administration, Windows Server, Active Directory and Entra Connect.

● Identity, Endpoint & Security

Entra ID, Conditional Access, Intune, Windows 365 and security baselines.

● Automation & IT Operations

PowerShell automation, provisioning, reporting and service improvement.

● AI-enhanced IT Operations

Controlled AI workflows for documentation, incident summaries and knowledge reuse.

● Partner Delivery

Flexible senior capacity for projects, transitions, escalations and subcontracting.

WHERE ENKI TECH ADDS VALUE

Senior contribution where delivery risk is highest

Transformation and migration workstreams

Complex Microsoft Cloud incidents and escalations

Operational reliability, governance and documentation

Automation of repeatable administration and reporting

PROJECT DELIVERY - OPERATIONAL IMPROVEMENT - PARTNER SUPPORT

Independent consulting for direct clients, integrators and technology partners across Europe

Evidence, engagement and trusted delivery

SELECTED EXPERIENCE

Sanitized enterprise delivery examples

12,000+ USERS

Large-scale Windows 365 Cloud PC migration

Technical leadership in a transition from Citrix to Windows 365 across hybrid production and development environments.

SELECTED OUTCOMES

- Endpoint manageability
- Operational flexibility
- Migration support

L2/L3 OPERATIONS

Digital collaboration operations in secure environments

Operational responsibility across Exchange, Exchange Online and Microsoft Teams with troubleshooting and risk input.

SELECTED OUTCOMES

- Service reliability
- Incident ownership
- Security-related SME support

POWERSHELL

Automation for recurring IT operations

Automation of provisioning, mailbox administration, backup routines and compliance reporting with documentation and traceability.

SELECTED OUTCOMES

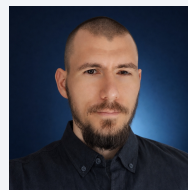

- Lower manual workload
- Better consistency
- Improved audit readiness

ENGAGEMENT MODELS

Flexible B2B cooperation

- Defined project or technical workstream
- Flexible senior consulting capacity
- L2/L3 operational and escalation support
- Partner-led subcontracting engagement

FOUNDER & CREDENTIALS

Evgeniy Tsvetov

Founder & Lead Microsoft Cloud Consultant

15+ years across cloud, workplace, hybrid infrastructure and secure operations.

Microsoft Certified: Azure AI Fundamentals

Azure Infrastructure as Code - Terraform on Azure
